

Lake Assessment Report

DAWSON LAKE

8/27/2004

Lake assessments are being conducted to contribute physical and ecological data to the Atlas as a collaborative effort between project partners. The goal is to rapidly assess many of the lakes in the county and thus provide stakeholders a better understanding of the character of the lake, its shore, and the aquatic plants present there. These data are intended to assist in the future management of the lake and its watershed.

The first section of the report provides the results of the bottom mapping effort: a contour (bathymetric) map of the lake, area, volume and depth statistics, and the water level at the time of assessment (if available).

The second section provides the results of the ecological (vegetation) assessment conducted on the lake. These results can be used to better manage vegetation in the lake. A list is provided with the different plant species found at various sites around the lake. Potentially invasive, exotic (non-native) species are identified in a plant list and the percent of exotics is presented in a summary table. The results of this study are compared with other lakes in the watershed.

The intent of the assessment is to provide a starting point from which to track changes in the lake. These data can provide the information needed to determine changes and to monitor trends in physical condition and ecological health of the lake.

I. Physical Data – Area, Depth, Volume, & Bottom Contours

The bottom of the lake was mapped using a Global Positioning System (GPS) to determine the boat's position, and a depth-finder to provide depth associated with that measured position. The result is an estimate of the lake's area, mean and maximum depths, and volume (Table 1) and the creation of a bottom contour map. *NOTE: This map is for recreational purposes only.*

Table 1: Physical Characteristics of the Lake

Surface Area (acres):	<u>18.70</u>
Mean Depth (feet):	<u>5.30</u>
Maximum Depth (feet):	<u>10.80</u>
Volume (gallons):	<u>32,558,978</u>

The lake assessments are created in partnership with Seminole County and the Florida Center for Community Design and Research at USF. If you have any questions, please use the "Contact Us" form on the Seminole Atlas Website (www.seminole.wateratlas.org)

Dawson Lake

Section Township Range

Estimated Lake
Perimeter

EXPLANATION:

Assessment Date: August 02, 2004
Lake water level was 40.7 ft above sea level when the lake was assessed.
Contours are expressed in absolute depth below this level and may not exclude the presence of submerged aquatic vegetation.

DATA SOURCES

Seminole County 1999 Color aerials provided by Seminole County Public Works. All contours generated by Florida Center For Community Design and Research based on GPS/Sonar data provided by Seminole County Stormwater Division.

0 125 250 375 500 Feet

II. Ecological Data - Aquatic Plant Survey

Approximately equispaced sites (typically ten or more) are mapped around the lake and the aquatic plants at each site are surveyed. The total number of species from all sites is used to approximate the total diversity of aquatic plants and the percent of invasive-exotic plants on the lake and in the watershed (Table 2). Many of these plants are considered ecologically harmful, as they tend to out-compete beneficial native species. Such “nuisance” plants can also make boating and other recreational activities difficult or impossible. The common and scientific names of plant species found on your lake are listed in Table 3.

Table 2: Comparison of species diversity between the lake and other assessed lakes located within the same watershed

	<u>Lake</u> DAWSON LAKE <i>(Average)</i>	<u>Watershed</u> Lake Monroe (L-S Canal)
Number of Taxa:	30	32
Percent Exotic Plants:	17%	18%

Table 3: Botanical and common names of the most commonly found plants on the lake. Percent frequency (of occurrence), habit (location where found), status (native or exotic), and EPPC status are provided

Common Name	Scientific Name	Frequency	Habit	Status	EPPC
Alligator Weed	Alternanthera philoxeroides	100%	Emergent	Exotic	II
Baldwin's Spikerush, Roadgrass	Eleocharis baldwinii	100%	Submersed	Native	NL
Peruvian Primrosewillow	Ludwigia peruviana	100%	Emergent	Exotic	NL
Spatterdock, Yellow Pondlily	Nuphar lutea	86%	Floating	Native	NL
American White Water Lily, Fragrant Water Lily	Nymphaea odorata	86%	Floating	Native	NL
Maidencane	Panicum hemitomon	86%	Emergent	Native	NL
Pickereel Weed	Pontederia cordata	86%	Emergent	Native	NL
Water Spangles, Water Fern	Salvinia minima	86%	Floating	Native	NL
Para Grass	Urochloa mutica	86%	Emergent	Exotic	I
Manyflower Marshpennywort, Water Pennywort	Hydrocotyl umbellata	71%	Emergent	Native	NL
Algal Mats, Floating	Algal spp.	57%	Floating	Unknown	Unknown

Common Name	Scientific Name	Frequency	Habit	Status	EPPC
Buttonbush	<i>Cephalanthus occidentalis</i>	57%	Emergent	Native	NL
Fragrant Flatsedge	<i>Cyperus odoratus</i>	57%	Emergent	Native	NL
Mexican Primrosewillow, Long-stalked Ludwigia	<i>Ludwigia octovalvis</i>	57%	Emergent	Native	NL
Southern Naiad	<i>Najas guadelupensis</i>	57%	Submersed	Native	NL
Torpedo Grass	<i>Panicum repens</i>	57%	Emergent	Exotic	I
Carolina Willow	<i>Salix caroliniana</i>	57%	Emergent	Native	NL
Cattails	<i>Typha</i> spp.	57%	Emergent	Native	NL
Buttonweed	<i>Diodia virginiana</i>	43%	Emergent	Native	NL
Stonewort	<i>Nitella</i> spp.	43%	Submersed	Native	NL
Climbing Hempvine	<i>Mikania scandens</i>	29%	Emergent	Native	NL
Panic Grasses	<i>Panicum</i> spp.	29%	Emergent	Unknown	NL
Duck Potato	<i>Sagittaria lancifolia</i>	29%	Emergent	Native	NL
Chinese Tallow Tree	<i>Sapium sebiferum</i>	29%	Emergent	Exotic	I
Bald Cypress	<i>Taxodium distichum</i>	29%	Emergent	Native	NL
Jamaica Swamp Saw Grass	<i>Cladium jamaicense</i>	14%	Emergent	Native	NL
Southern Cut Grass	<i>Leersia hexandra</i>	14%	Emergent	Native	NL
Creeping Primrosewillow, Red Ludwigia	<i>Ludwigia repens</i>	14%	Emergent	Native	NL
Pine Tree	<i>Pinus</i> spp.	14%	Emergent	Native	NL
Smartweed, Knotweed	<i>Polygonum</i> spp.	14%	Emergent	Native	NL
