# SPRING WOOD LAKE: ANNUAL MEETING

Date /Time/ Location:	Wednesday, January 25, 2023 /10:15 am - 11:00 am/ ZOOM – Virtual
Community Liaisons:	Larry Hanks, Mike Gerber, Pekor Sarafaith, Mel Schubert, Mary Vanbrunt
Liaisons Present:	<b>Larry Hanks</b>
Seminole County:	Thomas Calhoun, Tony Cintron, Daniel Barber, Chad Day, Michael Eason, Tameka Morton, Michelle Rosa-Munger, Lynda Reaves

## General Topics & Updates

### Lake Management Program

- Welcome
- Shoreline Protection Ordinance Status
  - Approved in April 2021
- Lake Status Nutrients/Habitat Scores [Refer to Exhibit C: Bioassessment Indices]
  - Water quality trending in negative direction
  - TSI scored 44 in Good category
  - LVI score remains in the impaired category
  - LVI/BioBase data on Watershed Atlas website:
  - <http://www.seminole.wateratlas.usf.edu/shared/ecology.asp?wbodyid=7660&wbodyatlas=lake>
- Treatment Plans - Current & Proposed [Refer to Lake Management Plan]
  - Monitor hydrilla and treat as necessary (early detection-rapid response)
    - Hydrilla perimeter treatments **when needed**
  - Evaluate grass carp fish effects and adjust stocking rate as necessary
  - **Keeping access corridors open**
- General Recommendations for Lake Community Consideration [Refer to Lake Management Plan]
  - Increase native aquatic plantings in areas devoid of vegetation
  - Promote “welcome packages” to new lakefront homeowners – **Larry needs packets**
  - Lakewatch samples – need volunteer. **Mark Abbott’s daughter**
  - Hold community meeting – **Larry to advise update**
- 2023 Shoreline Planting Event – Dates tentative
  - To be coordinated via Tony Cintron
  - Plants to be funded by MSBU funds
  - Combo event w/Springwood Waterway
- Other
  - Grass Carp fish barrier maintenance
  - Email addresses for routine communications and important announcements
  - **HOA to install new boat ramp**

### MSBU Program & Resource Management Department

- Financial Summary [Refer to Exhibit B]
  - Reserve Funds include provisions for future essential use as recommended by LMP

# SPRING WOOD LAKE LAKE MANAGEMENT PLAN

## GENERAL PROVISIONS

### **Scope of Public Lake Management Services**

The scope of public lake management services funded by non-ad-valorem assessment includes those services associated with managing aquatic plant communities as deemed beneficial and/or critical to restoring, developing and/or maintaining conditions that enhance the water quality and over-all health of the waterbody; with emphasis on providing public services for public purposes which by definition of public are limited to the waterbody and respective shoreline when/where noxious and/or invasive exotic vegetation could/would threaten or impede the waterbody.

### **Governing documents**

- Seminole County Ordinance 10-17
- FWC Triploid Grass Carp Permit

### **Methods for Aquatic Weed Control as authorized via County Ordinance/Resolution**

- Chemical (herbicides)
- Biological (sterile triploid grass carp fish [TGC])
- Physical (hand removal)

### **Targeted Invasive/Exotic Aquatic Vegetation**

- Hydrilla, southern naiad, alligator weed, torpedo grass, primrose willow, water lily, pickerelweed, wild taro, cattail, barnyard grass, salvinia, and algae.

### **Frequency of Aquatic Vegetation Management Treatment (herbicides)**

Treatment services are performed at the direction of the Seminole County LMP as per the Spring Wood Lake Management Plan reviewed at the annual planning session with the expectation that the Seminole County LMP may alter anticipated treatments as merited per changing/evolving conditions noted during site inspections.

### **Herbicide Treatments - Service Provider**

- As determined by Seminole County

### **Funding**

Financial management of the MSBU fund is provided by the Seminole County MSBU Program. Financial plans developed by the MSBU Program include eligible expense funding requests submitted by the Lake Management Program and other cost and revenue components typical to MSBU funds. Financial information inclusive of prior year actual outcome, current year working budget and next year budget proposal data is reported annually. Assessment levy is subject to Board approval and the standard procedures associated with non-ad valorem assessment. The financial plans may be adjusted by the County as merited per changing/evolving essential services as directed by the County and per financial planning considerations. The governing ordinance does not include assessment restrictions specific to annual adjustment amounts and/or assessment cap.

### **Seminole County Employees**

Information for contacting the employees of Lake Management and the MSBU program:

**Lake Management** – Thomas Calhoun ([tcalhoun@seminolecountyfl.gov](mailto:tcalhoun@seminolecountyfl.gov)), Tony Cintron ([acintron@seminolecountyfl.gov](mailto:acintron@seminolecountyfl.gov)), Daniel Barber ([dbarber02@seminolecountyfl.gov](mailto:dbarber02@seminolecountyfl.gov)), Chad Day ([cday02@seminolecountyfl.gov](mailto:cday02@seminolecountyfl.gov))

**MSBU** – Michael Eason ([meason@seminolecountyfl.gov](mailto:meason@seminolecountyfl.gov)), Tameka Morton ([tmorton@seminolecountyfl.gov](mailto:tmorton@seminolecountyfl.gov)), Michelle Rosa-Munger ([mrosamunger@seminolecountyfl.gov](mailto:mrosamunger@seminolecountyfl.gov))

### **Lake Liaisons**

Designated property owners (or their designated representatives) provide community representation at annual planning sessions with the County and serve voluntarily as the key point of contact for community inquiries and concerns. The liaison for Spring Wood Lake is Larry Hanks ([lhanksjr@gmail.com](mailto:lhanksjr@gmail.com)), Mike Gerber ([ishkeybobo@aol.com](mailto:ishkeybobo@aol.com)), Pekor Sarafaith ([feelyourjoy@gmail.com](mailto:feelyourjoy@gmail.com)), Mel Schubert ([melstarpon@aol.com](mailto:melstarpon@aol.com)), and Mary Vanbrunt ([vanbruntmary@gmail.com](mailto:vanbruntmary@gmail.com)).

## **COMMUNITY-BASED ACTIVITIES & EVENTS**

LMP recommends/encourages homeowners to coordinate a resident-based volunteer event involving native plantings along the shoreline of Spring Wood Lake. The intention of such an event is to plant beneficial native aquatic plants to key areas in need along the bank. It is especially important that as the aquatic invasive plants (such as torpedo grass) are being treated, native aquatic plants should be established within these areas. The presence of the recommended native plant species along the shoreline provides habitat for fish and wildlife, helps impede invasive exotics from re-establishing, and reduces erosion of the shoreline. All of these best management practices are essential to providing the conditions that promote an environmentally stable habitat to be enjoyed by generations to come. The key to success is dependent on strong participation of the Spring Wood Lake community.

Continued recommendations for community initiatives are as follows:

- 1) Plant a healthy shoreline with native emergent plants;
- 2) Establishing a formal Lake Association holding at least one annual meeting with topics relevant to your lake;
- 3) Establish a backyard berm and swale system where applicable;
- 4) Continue to increase educational outreach programs i.e. Shoreline Restoration Workshops (planting days), Florida Yards and Neighborhoods (FYN), Lake Management Video mail-outs, and reduction of residential pollution such as grass clippings, Contact us at 407-665-5542 for assistance;
- 5) Fertilize wisely by using phosphorous free and slow-release nitrogen based fertilizers only. Visit [www.seminolecountyfl.gov/fertilizer](http://www.seminolecountyfl.gov/fertilizer) for more information; and
- 6) Provide content for the Seminole County Water Atlas Lake Management Webpage for your lake (such as newsletters and photos).

***Important to Note:*** When herbicides are applied along the shoreline to invasive plants (such as torpedo grass), overspray onto adjacent desirable vegetation may occur. To avoid damage to desired vegetation, manual (by hand) removal (by property owner) of the undesirable species from among the desirable species along the shoreline is advised. If the invasive plants are removed by this method, spraying the area can be reduced, thereby offering greater protection to the desirable species. The physical removal of dead/decaying aquatic plant material will reduce the volume of decomposing vegetation on the lake bottom (muck layer) and will increase the success of the efforts to limit the re-growth of the invasive plants. The presence of submerged aquatic vegetation (“SAV” such as hydrilla) should be communicated to your lake liaison for their reporting to the County so appropriate treatment of SAV can be provided.

## **COUNTY SERVICES – Lake Management & Supplemental Programs**

LMP provides continued evaluation of the aquatic plant species, such as hydrilla, and provides community updates on the status of treatments and waterbody bioassessments. While the MSBU assessment includes a nominal charge for administering the MSBU, the amount charged does not cover all the expenses incurred by the County on behalf of the waterfront property owners. Spring Wood Lake is monitored by LMP to assess the aquatic plant growth. Many of the services provided by the LMP are made available to support community riparian stewardship without additional charges being assigned to the MSBU budget.

## **CURRENT FISCAL YEAR – Planned Treatment & Funding**

### **Primary Aquatic Plant Management Expectations**

Hydrilla growth in Spring Wood Lake has the likelihood to continue; however, the timing and extent of hydrilla re-growth is affected by multiple natural and environmental factors that cannot be controlled or predicted with certainty. While extensive growth of hydrilla is possible at any point in time; it is anticipated that routine spot treatments of hydrilla with herbicides and continuous biological control pressures from the triploid grass carp fish will be sufficient to manage hydrilla re-growth during the current fiscal year. The anticipation of spot treatments for the current fiscal year takes into consideration the historic trend of hydrilla management required at Spring Wood Lake, as well as current conditions observed at the lake. As with any lake with a history of hydrilla infestation, long-term planning to include financial preparation for whole lake treatment is advised.

Primary expectations are as follows:

- 1) Aquatic herbicide maintenance for non-native vegetation along with hydrilla treatment (as needed)
- 2) Maintain access corridor/open for access
- 3) Monitor hydrilla, other submersed aquatic plants, and grass carp fish effects
- 4) Grass carp stocking per FWC permit amendment

### **Funding Expectations**

*Refer to current fiscal year data provided in Exhibit B.*

## **NEXT FISCAL YEAR – Projected Treatment & Funding**

### **Primary Aquatic Plant Management Expectations**

The projected treatment plans for the next fiscal year remain consistent with the plans and expectations noted for the current fiscal year. Primary expectations are as follows:

- 1) Continued aquatic herbicide maintenance for non-native vegetation along with hydrilla treatment (as needed)
- 2) Continue to keep access corridor maintained and open for access
- 3) Continued monitoring of hydrilla, other submersed aquatic plants, and grass carp fish effects
- 4) Future grass carp stockings if deemed necessary and authorized by permit
- 5) Continue aquatic plantings with sensitive taxa to improve lake health and score

### **Funding Expectations**

*Refer to next fiscal year data provided in Exhibit B.*

## **Exhibits**

**A** – Agenda & Notes (Prior Year)

**B** – Financial Summary

**C** – Historic Reports/Data

**D** – Roles and Responsibilities

## SPRING WOOD LAKE: ANNUAL MEETING NOTES PRIOR YEAR

Date /Time/ Location:	Monday, February 28th, 2022 /10:15 am - 10:52 am/ ZOOM – Virtual
Community Liaisons:	Larry Hanks
Liaisons Present:	Larry Hanks
Seminole County:	Daniel Barber, Thomas Calhoun, Tony Cintron, Michael Eason, Lynda Reaves

### General Topics & Updates

#### Lake Management Program

- Welcome
- Shoreline Protection Ordinance Status
  - Approved in April 2021
- Lake Status Nutrients/Habitat Scores [Refer to Exhibit C: Bioassessment Indices]
  - Water quality trending in negative direction
  - TSI in Good category
  - LVI score in the impaired category – finding hydrilla in the assessments which lowers the score
  - LVI/BioBase data on Watershed Atlas website:
  - <http://www.seminole.wateratlas.usf.edu/shared/ecology.asp?wbodyid=7660&wbodyatlas=lake>
- Treatment Plans - Current & Proposed [Refer to Lake Management Plan]
  - Monitor hydrilla and treat as necessary (early detection-rapid response)
    - Frequent hydrilla perimeter treatments – keeping access corridors open
  - Evaluate grass carp fish effects and adjust stocking rate as necessary – fish to be added in the next year or so
    - Carp migrating through whole system. Loss of pressure on Spring Wood Lake hydrilla
- General Recommendations for Lake Community Consideration [Refer to Lake Management Plan]
  - Increase native aquatic plantings in areas devoid of vegetation – Altamonte side 30% of total, maybe plantings can be put there? Not interfering with in/out corridors so maybe some benefit with no push-back. Thomas and Tony will reach out to apartment complex after Larry forwards email to contact there.
  - Promote “welcome packages” to new lakefront homeowners
  - Lakewatch samples – need volunteer. Larry’s kids too busy with school at this time
  - Educate community on Shoreline Protection Ordinance
- 2022 Shoreline Planting Event – Dates Available
  - To be coordinated via Tony Cintron – Tony will send email with plant examples. Larry ok with pickerelweed but not duck potato. Larry also asked about cypress trees; we can look at this for the future.
  - Plants to be funded by MSBU funds – Plants approximately \$1000 per event to be paid out of contingency funds.
  - Combo event w/Springwood Waterway
  - Addition of sensitive taxa to improve lake health/score – bring in sensitive wetland type species to help raise score (but NO DUCK POTATO please per Larry).
- Other
  - TGC fish barrier maintenance: waterway outfall improvements and regular debris maintenance of fish barriers under MSBU funds
    - New vendor – once barriers replaced, new monthly maintenance is paid out of Springwood Waterway budget, not Spring Wood Lake budget
  - Email addresses for routine communications and important announcements
  - Nutrient Abatement/Wymore Rd water quality projects and updates
  - Sediment trap status? Larry says the lily pads are getting large behind where the drain is into lake on his property line by yellow turbidity barrier; can we take 30% off? Duck potatoes around drain are building up too, needs clearing for better flow. Drainage coming from Lake Destiny Condos – prevent delta creation 100 yards to south, 100 feet out 2 feet deep skiers fall.

MSBU Program & Resource Management Department

- Financial Summary [Refer to Exhibit B]

Reserve Funds include provisions for future essential use as recommended by LMP

**Exhibit B - Financial Summary**

**MSBU FUND: SPRING WOOD (LAKE)**

	Tax Year	2021	2022	2023
	Assessment	\$ 300	\$ 300	\$ 300
	Fiscal Year	FY21-22	FY22-23	FY23-24
<b>Revenue</b>		<b>Actual</b>	<b>Working</b>	<b>Proposed</b>

<b>Total Expenditure &amp; Reserves</b>	<b>\$</b>	<b>4,015</b>	<b>\$ 5,088</b>	<b>\$ 5,088</b>
<b>Reserve/Contingency<sup>1</sup></b>	<b>\$</b>	<b>39,553</b>	<b>\$ 39,900</b>	<b>\$ 40,247</b>
<p>1 Note: These funds are secured (1) for maintaining rate stability as annual cost are known to fluctuate, (2) in preparation of planned or anticipated future expenses, (3) to provide response to emergency and/or urgent needs for which planning was not feasible. These funds are not intended for expenditures that could be planned and included in annual budget planning processes.</p>				
LM Program Enhanced Services Cost	Pending development & confirmation			

## **Reserve/Contingency Funds**

The financial summary [Exhibit B] of the Annual Report was updated in 2019 to include additional information about contingency fund status. The MSBU Program has provided this additional information to improve transparency respective to the reason and intended purpose for these funds.

The primary purpose for establishing operating contingency funding is twofold – (1) To have funding on hand to accommodate unexpected essential aquatic weed control emergencies that cannot be reasonably foreseen, planned or identified in routine budget planning & forecasting and (2) To provide rate stability as costs for ongoing services often vary from year to year. By establishing contingency and reserve funds, such funding may be allocated temporarily from these funds to operating expenditures to avoid periodic spikes in assessment.

Contingency funds are developed by financial management planning decisions and by default when actual expenditures are less than budgeted expenses. Although reserve/contingency funds are not expected to be expended in any given year, these values are included under expenditures because they are “on hold” for future needs and are classified by accounting practices as expenditures.

In the financial summary (Exhibit B) the total dollars in reserve/contingency are identified in the expenditure section on a single line (darker shading). The total dollars in contingency are calculated by subtracting the other expenditures (typically “contracted services” and “administrative fee”) from the total revenue. Contingency funds may be used as deemed essential to meeting emergency needs of the waterbody; however, the overall intention of use is as per the noted sub-categories.

When a negative value is displayed in the sub-category labeled “operating contingency”, it is an indication that the other subcategories reflect targeted sub-category values that have not been fully developed. For the other sub-categories to be fully developed, the “operating contingency” sub-category must be zero or a positive value.

The sub-category labeled “Reserve: Other” is included for improved transparency as use of these funds is on hold for purposes that are subject to Board confirmation and subsequent evaluation of ordinance provisions (potentially ordinance amendment) before these funds can be budgeted and utilized for the proposed purposes.

## Exhibit C - Historic Reports/Data

Additional information for Spring Wood Lake can be found on the Seminole County Water Atlas website at:

<http://www.seminole.wateratlas.usf.edu/lake/waterquality.asp?wbodyid=7660&wbodyatlas=lake>

<http://www.seminole.wateratlas.usf.edu/resourceprogram.aspx?aid=15&wbodyid=7660>

### **Spring Wood Lake Water Quality Report: How Does My Lake Rank?      **TSI SCORE: 44 GOOD****

The Trophic State Index (TSI) is a classification system designed to "rate" individual lakes, ponds and reservoirs based on the amount of biological productivity occurring in the water. Using the index, one can gain a quick idea about how productive a lake is by its assigned TSI number. A "Good" quality lake is one that meets all lake use criteria (swimmable, fishable, and supports healthy habitat).

A TSI score of 60 or above is considered impaired (or polluted) lake. Continued reduction of TP sources (personal pollution, run-off, landscaping practices, shoreline erosion) can help reduce phosphorous in your lake that is abundantly available, potentially creating algae blooms.

### **Lake Vegetation Index Bioassessment (LVI): How Does My Lake Rank?      **40 Impaired****

The Lake Vegetation Index is a rapid bioassessment tool created by the Florida Department of Environmental Protection (FDEP) to assess the biological condition of aquatic plant communities in Florida lakes. The most recent LVI bioassessment for Spring Wood Lake (sampled August 2, 2022) scored a **40 Impaired**, which is in the **Impaired** Category. This is a similar score to the previous year's score of **39 Impaired**. A lack of sensitive taxa is again contributing to a lowered LVI score.

Aquatic Life Use Category	LVI Range	Description
Category 1 "exceptional"	78–100	Nearly every macrophyte present is a species native to Florida, invasive taxa typically not found. About 30% of taxa present are identified as sensitive to disturbance and most taxa have C of C values >5.
Category 2 "healthy"	43–77	About 85% of macrophyte taxa are native to Florida; invasive taxa present. Sensitive taxa have declined to about 15% and C of C values average about 5.
Category 3 "impaired"	0–42	About 70% of macrophyte taxa are native to Florida. Invasive taxa may represent up to 1/3 of total taxa. Less than 10% of the taxa are sensitive and C of C values of most taxa are <4.

## **Exhibit D**

### **ROLES & RESPONSIBILITY**

#### **General Outline**

#### **COUNTY**

##### *Seminole County will*

- ✓ Govern the MSBU
- ✓ Provide financial management of MSBU fund and assessment levy
- ✓ Ensure activities conducted with assessment funding align with the scope of services documented in the governing ordinance
- ✓ Ensure the lake is monitored and services are appropriately rendered
- ✓ Maintain decision-making authority relative to public services and will defer to best lake management practices when making such decisions
- ✓ Provide an ongoing lake management plan based on the defined service scope, permitting, conditions at the lake, funding parameters, and best lake management practices. The Lake Management Plan will be developed and maintained by the Lake Management Program with liaison participation
- ✓ Initiate and manage service contracts, monitor results, and communicate updates on a routine basis
- ✓ Conduct annual meetings that offer opportunity for liaison discussion as to prior, current, and future action plans
- ✓ Encourage liaisons and assist with educational outreach efforts to protect the health and water quality of the waterbody

#### **LIAISONS**

##### *Liaisons will*

- ✓ Encourage communitywide awareness and participation relative to environmental stewardship recommendations and opportunities
- ✓ Provide communitywide communication and assist the County in the distribution of relevant lake information
- ✓ Attend annual lake management and budget planning sessions conducted by the County
- ✓ Serve as representatives of the community on lake issues; representing the respective lake community as a whole
- ✓ Monitor lake conditions and provide feedback to the County as to observations
